

## **Feedback from visiting teachers (Maths No Problem Open Day)**

**June 2023**

*In June 2023, as part of our role as a Maths No Problem Model School, we hosted an Open Day event for teaching professionals to visit and see Maths across our school. Below is a selection of comments received.*

- Amazing opportunity to see how another school runs and teaches Maths. Staff very helpful and friendly. All children engaged at all times and knew how to use equipment. Thank you.
- Excellent behaviour for learning, fostered by teachers' high expectations. Consistency is evident across school, yet it is clear teachers are empowered to make decisions for their classes. Great presentation in books.
- I am brand new to teaching MNP and hugely valued the journaling sessions – the emphasis on collaboration, mathematical and independent thought.
- Thank you. It was very valuable to see the lessons in action and see the progression in the journals from EYFS. All the teachers were happy to take time to talk and answer questions. A great morning.
- Fantastic insight into your MNP journey. Well organised, informative and really helpful. Really impressed with the journaling. Thank you.
- I felt very welcomed by all staff when entering classrooms. Teachers took the time to talk through what they were doing and why. All children were polite and chatty.
- Great to watch lessons in action and see how the classes mirror each other.
